

COVID-19 Counts in Washington State and Select Other Locations: Weekly Updates

Nathan (Nat) Goodman

December 8, 2021

Counts of cases and deaths are key metrics of COVID-19 prevalence and burden, and are the basis for model-based estimates and predictions of these statistics. This page provides links to weekly updates that present graphs showing these metrics over time in Washington state and a few other USA locations of interest to me. I originally posted updates on Mondays but have switched to Wednesdays to accommodate changes in the Washington State Department of Health (DOH) data release schedule.
